## PROFILE

---

A motivated engineering student exploring Cyber Security and System-Level Programming. Possessing practical knowledge in Vulnerability Assessment and Penetration Testing (VAPT), Malware Analysis, Cloud Security, and Mobile Application Penetration Testing. Currently learning **Spring Boot** and its libraries for building scalable **microservices** and backend applications. Strong in **Data Structures, Algorithms, and Logic Building** with a focus on problem-solving.

## EDUCATION

---

|                                                                                                                       |                                                     |

## SKILLS

---

- Programming Languages:** Java, Python
- Web Development:** HTML, CSS
- Databases:** MySQL
- CS Fundamentals:** Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks

## ACHIEVEMENTS AND CERTIFICATIONS

---

- LeetCode** [Profile]: Solved **50+ DSA problems**
- GeeksforGeeks** [Profile]: Solved **150+ Problems**
- Quick Heal Certified Cyber Security Analyst**
- Quick Heal Certified Malware Analyst and Reverse Engineer**
- Quick Heal Certified Vulnerability Assessment and Penetration Testing Analyst**
